

## EU Declaration of Conformity - Packaging

Regulation (EU) 2025/40 - Annex VIII

Chipolo POP - Promotional box

| Declaration information  | Value                         |
|--------------------------|-------------------------------|
| Declaration number       | PPWR-DOC-C24W-PROMO-Rev1      |
| Product type             | Chipolo POP - Promotional box |
| Packaging identification | MPP.0000170.000               |

### 1. Unique identification of the packaging

This declaration covers the following packaging components, which together make up the Chipolo POP promotional box packaging. SKU MPP.0000170.000 is the assembly identifier covering all five components listed below - it is not a single uniform material, and each row is listed separately here for traceability:

| Component                    | SKU             | Variant                                            |
|------------------------------|-----------------|----------------------------------------------------|
| Base board                   | MPP.0000170.000 | 1.5 mm greyboard - part of assembly                |
| Base wrap                    | MPP.0000170.000 | 150 gsm woodfree paper - part of assembly          |
| Base liner                   | MPP.0000170.000 | 150 gsm woodfree paper - part of assembly          |
| Sleeve                       | MPP.0000170.000 | 250 gsm woodfree paper, printed - part of assembly |
| Insert assembly (3 elements) | MPP.0000170.000 | 250 gsm woodfree paper - part of assembly          |

### 2. Manufacturer

Chipolo d.o.o.  
Gabrsko 12  
1420 Trbovlje  
Slovenia

### 3. Sole responsibility

This declaration of conformity is issued under the sole responsibility of the manufacturer.

### 4. Object of the declaration

Single-use, non-food-contact promotional packaging for the Chipolo POP tracking tag. The packaging is a rigid two-piece box construction: a 1.5 mm greyboard base board wrapped in printed 150 gsm woodfree paper (base wrap and base liner), together with a printed 250 gsm woodfree paper sleeve and a three-element 250 gsm woodfree paper insert assembly that holds the tracking tag in place. All paper components are supplied by Baosong Paper (China) via converter Hong Kong Honda. The only surface treatment on the printed elements is an oil-based overprint varnish; there is no plastic lamination, film coating or composite layer.

This declaration covers the single standard color/print variant of the promotional box currently produced.

Flat sleeve/wrap print dimensions: approximately 244 mm x 140 mm. Assembled/folded package footprint is approximately 100 mm x 140 mm x 11 mm.

The quick-start guide, user manual, handling & warranty leaflet and regulatory compliance leaflet packed inside the box are product documentation and are excluded from the packaging composition assessed here.

## **5. Relevant Union harmonisation legislation**

The object of this declaration is in conformity with the requirements under Regulation (EU) 2025/40 of the European Parliament and of the Council of 19 December 2024 on packaging and packaging waste (OJ L, 2025/40, 22 January 2025), including the transitional essential requirement retained by Article 70 from Directive 94/62/EC.

## **6. Standards, common specifications and technical specifications**

With the exception of the transitional essential requirements for packaging minimisation under Article 70(1)(b), no harmonised standards under Article 36 or common specifications under Article 37 of Regulation (EU) 2025/40 are currently available.

To demonstrate and verify conformity, the following harmonised standards (applied as transitional provisions or guidance) and analytical test methodologies were applied:

- Heavy metals concentration limits (Article 5(4)): quantified by ICP-OES/AAS and UV-Vis analysis, in accordance with the accredited laboratory test reports covering the paper and ink components of this packaging.
- Recyclability (Article 6(1)): EN 13430:2004.
- Packaging minimisation (Article 10 / transitional requirement under Article 70(1)(b)): EN 13428:2004.

This packaging's rigid two-piece box, wrap, liner, sleeve and three-element insert construction is a multi-layer format used specifically for the promotional presentation of this SKU, distinct from the simpler single-wall folding boxes used for the standard packs above. Each layer serves a distinct structural or presentation function: the greyboard base provides rigidity, the wrap and liner finish the base board, the sleeve carries the printed branding, and the insert assembly holds the product. The components are sized to closely fit the product

and its accompanying documentation, which supports minimization of substances of concern and supports recyclability.

## 7. Notified body

Not applicable. The PPWR Annex VII internal production control procedure used for this packaging does not require notified-body intervention.

## 8. Additional information

The technical documentation required to demonstrate conformity is compiled and maintained in the technical file under reference TF-Chipolo-POP-PromoBox, Version 1.0, dated 07.08.2026.

This declaration applies only while series production remains identical to the assessed configuration for the listed promotional box configuration.
